

## Facts you must know

Dust and pollen filters prevent pollen and fine dust from unduly penetrating the vehicle interior. If the filters do not work properly they can pose a safety risk, because:

- › If you sneeze suddenly when driving at 50 km/h, you will travel 13 metres without seeing the road
- › According to the AvD (German Automobile Club – Automobilclub von Deutschland), one in four accidents is caused by the effects of allergies such as sneezing
- › Increased levels of dust, soot or micro-organisms in the air can cause driver to suffer from fatigue and lapses in concentration
- › Unpleasant odours can occur if dirt particles cannot be absorbed by clogged filters and instead get into the air-conditioning system
- › A clogged filter also reduces the blower speed. As a result, windows fog up more quickly leading to restricted visibility

For that reason the German allergy and asthma association (Deutscher Allergie- und Asthmabund e.V. (DAAB)) recommends that the pollen filter should be replaced every year

## Dust and pollen filters from Audi Genuine Parts

- › Filter 99 % of the pollen in the air and alleviate allergy symptoms such as sneezing fits and streaming eyes. Therefore they can also contribute to road safety
- › Effectively eliminate pollutants with their multi-layer filtering system. Large dust and soot particles can be trapped by the pre-filter, while lung-damaging fungal spores and pollen are retained by the second layer

- › Can protect allergy sufferers and help to ensure an adequate supply of fresh air inside the vehicle for all occupants
- › Reduce odours, bind gaseous pollutants and convert ozone into oxygen due to the additional activated charcoal microfilter layer
- › Prevent rapid fogging of the windows when fully operational, thus ensuring better visibility

## Why you must always insist on Genuine Parts

Dust and pollen filters from Audi Genuine Parts promote road safety and comfort by:

- › Minimising odours
- › Alleviating allergy symptoms
- › Eliminating pollutants
- › Reducing fog on the windows
- › Protecting your air-conditioning system

## Audi Genuine Parts

- › Are matched to the quality of the components used in the manufacture of the vehicle
- › Ensure coordinated interaction between all vehicle parts
- › Guarantee the highest possible level of safety through excellent performance and reliability

This is how your Audi stays Genuine.
